## SUMMARY

- Passionate Android and Web Developer with a strong foundation in mobile app development using Dart, Flutter, Android Studio and Web development using React.js, Tailwind CSS and Node.js. Skilled in creating intuitive and engaging applications. Proficient in UI design with Figma and experienced in real-time interactions using Firebase, MongoDB.
- Seeking opportunities to leverage my knowledge and enthusiasm to contribute meaningfully to a collaborative development environment.

## EDUCATION

**Computer Science Engineering**  
SDMCET, Dharwad | 2025

**CGPA - 8.15**  
As of 6th sem

## SKILLS

- Programming Languages: Java, Dart, C, PHP, JavaScript, Typescript
- Frameworks: Flutter, Tailwind CSS, ReactJs, GSAP, Node.js, NEXT.js, Three.js
- Database: MySQL, Firebase, MongoDB, PostgreSQL
- Version control: Git, GitHub
- Others: HTML, CSS, XML, Figma, UI Design, Postman, Docker

## EXPERIENCE

### **Android Developer at TS Bridge Edu**

**Feb - March 2024**

- Led a team of 4 in developing multiple applications, including a full-stack application for a Canada-based client and the core application of TS Bridge Edu.
- Designed intuitive and visually appealing user interfaces for various projects.
- Organized and facilitated online events for entrepreneurs, fostering networking opportunities.

## PROJECTS

### **iPhone 15 Pro Website Clone** [Link](#)

**July 2024**

- Built a pixel-perfect clone of the iPhone website
- Implemented a 3D iPhone model using Three.js
- Re-created stunning animations from the apple website.
- **Tech stack used: React.js, Tailwind CSS, Three.js**

### **Campus Buddy** [Link](#)

**April 2024**

- An application designed to help college students navigate their every-day college life.
- Access to college events, notices, internship and job opportunities, and maintenance reporting
- **Tech stack used: Flutter, Firebase, Android Studio, Git, Figma**

### **Event Management Application (Internship)**

**Feb 2024**

- Engineered an application for event management, empowering users to host and manage events efficiently.
- Enabled users to host or join events, fostering collaboration through chat and subgroup creation based on interests.
- **Leveraged technologies such as Flutter, Dart, Firebase, Git, and Figma.**

### **Other Projects**

- Weather Application**
- Neumorphic Chat Application**
